Education

- 09/2020 - 12/2023
Università degli Studi di Bologna
MSc in Artificial Intelligence
- 05/2017 - 10/2020
Università di Camerino
BSc in Computer Science

Skills

Programming

Python • TypeScript • React
Git • Pandas • NumPy

AI & ML

PyTorch • TensorFlow • Hugging
Face • OpenCV • MLOps

LLM & Agents

RAG • MCP
LangChain • Strands Agents
Prompt Eng • Model Eval

Infrastructure & Data

FastAPI • Docker • AWS • Azure
SQL • MongoDB • Firebase

Languages

Italian Native
English C1

Davide Perozzi

AI Engineer

I'm an AI Engineer with a proactive mindset. It's important to me to not just implement things, I actively contribute ideas to what we build.

Experience

06/2025 - present MC Egnineering s.r.l. | Remote

AI Engineer - Python Engineer

- Built a chat assistant with custom Deep Research tool, MCP UI and AP2 agentic payment flows using Strands Agents
- End-to-end agentic workflow for automated Q&A and financial analysis — document parsing, RAG on AWS Bedrock, FastAPI API layer.
- S2T evaluation system — assessed transcript adherence to scripts using sentence similarity and semantic search
- Azure-based ETL pipeline — components for data manipulation and transformation.

12/2023 - 06/2025 CellPly s.r.l. | Bologna, Italy

Software Developer - AI Engineer

I worked on analytical software for cell detection and analysis:

- Developing and maintaining TypeScript back-end
- Developing and maintaining Python detector pipeline
- Engineering and curating in-house datasets
- Training and evaluating cell detection model

06/2023 - 09/2023 CYENS | Nicosia, Cyprus

AI Research Assistant - Intern

I fine-tuned a cycleGAN on night-to-day image translation:

- Reviewing literature and select architecture
- Identifying, cleaning, and preprocessing suitable datasets
- Iterating model training and evaluating performance

05/2020 - 09/2020 GeoMORE s.r.l. | Camerino, Italy

Software Developer - Intern

Led my team in the design and implementation of GeoTour mobile app:

- Engineering React Native front-end and Firebase back-end
- Interpreting and achieving stakeholders' goals
- Discussing and assigning tasks to teammates

Freelance

- Built an end-to-end AI call handling platform that autonomously answers client calls and stores customer requests, using a Python/LiveKit pipeline and React dashboard.
- Designed and reviewed prompts for LLMs and critically evaluated outputs, providing feedback on alignment and accuracy
- Selling a full-stack suite for event subscription management
